CARLOS ALBERTO DE LA PEÑA JÁCOME

FULL STACK ENGINEER

Colombia | B2 English

Phone | Email | LinkedIn | Portfolio | GitHub

Professional Summary

Full Stack Engineer specialized in building modern web applications using React, Next.js, Node.js and ASP.NET Core. Experienced developing scalable RESTful APIs, secure JWT authentication, real-time applications with Socket.IO and cloud-native deployments on Azure, Render and Vercel. Passionate about building clean, maintainable and high-performance software.

Professional Experience

SMITCO S.A.S. — Software Developer

- Developed enterprise software modules supporting logistics operations, supplier management and container auditing within an internal business platform.
- Implemented secure authentication and business workflows while improving code maintainability and application scalability.
- Optimized backend processes and database interactions to enhance system responsiveness.
- Collaborated in the continuous evolution of production software following clean architecture and best development practices.

Constructora Rocaire — Full Stack Developer

- Built a modern corporate website using Next.js, delivering responsive user experiences and improving the company's digital presence.
- Implemented technical SEO, structured data and Google Rich Results to enhance search engine visibility and indexing.

Selected Project

Marketplace Platform

React • Node.js • PostgreSQL • JWT • Socket.IO • Cloudinary

Designed and developed a full-stack marketplace platform enabling users to securely publish, browse and manage products through a scalable client-server architecture.

- Developed RESTful APIs with Node.js and PostgreSQL, implementing secure JWT-based authentication and authorization.
- Engineered real-time buyer-seller communication using Socket.IO and integrated Cloudinary for cloud image management.

- Implemented shopping cart functionality and migrated deployment from Azure to Vercel (frontend) and Render (backend/database).

Technical Skills

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Material UI
Backend: Node.js, Express.js, ASP.NET Core, Spring Boot, RESTful APIs, JWT Authentication, Socket.IO
Databases: PostgreSQL, SQL Server, MySQL, MongoDB
Cloud: Azure, Render, Vercel, Cloudinary
Tools: Git, GitHub, Postman

Education

Systems Engineering — Universidad del Magdalena
